WHAT DOES IT MEAN TO BE OPTICIAN?

Ophtalmology, as one of the highly important fields of medicine that is studying the problems with our eyes, and especially when it comes to problems with eyesight, cannot obtain its goal without help from opticians, and it is always a sharp and good eyesight of every patient.

This human and interesting science or craftsmanship if you like, demands complete attention of a person, especially when matters of health are in question.

The job of optician is interesting, dynamic and by default it demands day to day communication with people, making of optical aids or glasses, and by doing that - preservation of anybody's eyesight.

The feeling that thru your work you can earn and in the same time help people is almost unique, and clearly it is something that takes this profession out of many others and puts it in a very high place among appreciated professions. This reflects to all opticians and their authority, making them highly respected throughout the World.

Optician, as "a long hand" of Ophtalmology, does his work wearing white coat, which clearly points that he is working in environment that looks like hospital, and optic shops do look like medical institutions.

The tools used by opticians are very light, it doesn't take too much strength to use it and that is why this job is done in a great deal and with much success, by women.

Optician means becoming morally and financially responsible, it creates feeling for esthetics, improves sense and talent for design and makes you more creative.

Besides that, an optician has to be a good psychologist, because everyday communication with people demands it. For successful and quality work of an excellent optician, necessary factors are: knowledge, patience and concentration.

To fulfill all this - you need to finish the four-year expert school, which can give you your future title and knowledge, by training and educating you with its top experts who have great experience.

If you like clean, physically easy, human, interesting and profitable job that has a perspective and future, this is the right call for you!!!

The number of regular students is limited !!!

With respect

Founder - Principal
Siniša Paš an

8.Optical Instruments	2 classes
9.Photography	2 classes
10.Religious / Civil Education	1 class
11.Practical course	12 hours

THE INFORMATION ON THE FAMILY COMPANY 'PASCAN OPTICS'

"Optika Pascan" started its successful career in 1989, situated in Ruma in 15. maj Street 139, where it still operates and wherefrom it started expanding on other places in Srem and soon after on two different locations in Novi Sad.

The founder and the owner is optician Mr. Sinisa Pascan, who works in the profession for three and a half decades, and who made possible for 'Optika Pascan' to be recognizable and indisputable family firm with tradition, as well as a well known brand, not only in the region, but also beyond our borders.

The work which is based on quality and quantity of sight improvements i.e. spectacles, makes the firm recognizable and the synonym of quality regarding the optician's profession.

The direct import of dioptical frames from abroad and the high quality of imported dioptrical glasses, mostly from Italy, achieved for 'Optika Pascan' to offer its products and services at the most acceptable prices, at the same time taking care about each individual and his or her position in the society.

Besides the proven quality of spectacles making, the prices adapted for everyone's pocket are just one of the essential elements concerning 'Optika Pascan', whereas the other elements are kindness, outmost trust and fair relationship with all the users of its services.

Shop addresses:

1. „Optika Paš an” 15. maj Street, 139, Ruma
phone/fax 022/471 696
2. „Optika Paš an” Šafarikova 13, Novi Sad
phone/fax 021/520 204
3. „Optika Paš an” Sutjeska 2, Spens, Novi Sad
phone/fax 021/ 66 23 164, 48 82 232

ABOUT OWNER

Siniša Pašan, born on 14th of December 1955. in Novi Sad, had a first touch with optician's craftsmanship when he was barely 15. As one of the most successful among his generation, he finished studies at the famous Getaldi school for opticians at Zagreb's „Ruđer Boškovi“.

Optics seems to be destined for Siniša Pašan, it became his life and he committed himself to it fully. With it and of it, he lives until this day. His footsteps are followed by his family – wife and two children, so the opticians craftsmanship entered within family Pašan in a large scale and became both tradition and trade mark.

Today, he lives and works in his own company – Optika „Pašan“ with members of his family, first of all in Novi Sad, where they have two fully equipped stores, but he is also quite famous and well visited in Ruma, where he opened his first shop.

As a fact that optics is for Siniša Pašan both tradition and trade mark, the best verifies that he is doing this job for full three and a half decades, from which almost 32 years as a professional. Most of that time, about 15 years, he spent by getting the usual routines and discovering secret charms of optics, in so called "public service" at company „Ghetaldus“. After that, until these days but also in future, he is using his knowledge to create his own company and to give to it a personal seal, so „Pašan“ optics became famous as well as its founder and owner Siniša Pašan.

Thanks to the high level of professionalism, hard and diligent work during past years, many contacts were made, both business and personal, with the owners of some Italian manufacturers of dioptr frames, sunglasses and optical glass. Therefore, it is not a wonder that Optika „Pašan“ under good conditions and in any hour, fulfills demands of a great deal of users of their services, with excellent quality products that European market can offer.

To stay focused to his life commitment and to always keep in touch with novelties and improvements in the field of optics, he regularly visits some of the most famous international fairs for opticians like „MIDO“ in Milan, or „SILMO“ in Paris.

During many years of hard work as an optician, he gave to it all his knowledge, love and skill, and as a result Optika „Paš an“ is in a very high place in Vojvodina. As a sign of recognition and respect, he earned trust of his colleagues who has chosen him for the President of the Association of Private Opticians of Vojvodina. In the same time he became a member of the executive committee of the Association of Serbian Opticians.

His role in affirmation of the craft is well known also to the common people, who are using his services. Even though he is committed to his work almost during all day, some of the time Siniša Paš an uses to educate others. His first book, „Glasses in service of a good sight“ was published in October of 2005. The book by its context, theme and purpose is the only one in our country committed to a broader public. Besides that, he is very occupied with many radio and TV shows with this thematic, and with many interesting and experts texts as an author, he is bringing closer the world of optics to us, Regular People. In many daily newspapers or magazines Siniša Paš an published his texts. Among all in „Dnevnik“ and „Magyar Szo“, than magazine „Lepota i zdravlje“ and „RU-7“.

As a logical consequence and continuation of such impressive involvement within the profesional occupation, an opening of the first private specialized, four year, Pascan high school for opticians on the Balkans, in Novi sad, has developed as the result.

Branislav Kostić , journalist

Book „THEORY FOR OPTICIANS“

The book has a concept that fits anyone who reads it, leading you in a best possible way to the secrets of this exact science. Based on his vast experience the author has grasped all that is necessary for anyone who wants to become an expert in the field of optics.

In this context, he covered certain areas of ophtalmology, optics, optics for glasses, optical instruments, contactology and technology of materials.

Book „GLASSES IN SERVICE OF GOOD EYESIGHT“

Author is giving us his expertise and advices that are adjusted even to the greatest sceptics, so that wearing of glasses could be as comfortable and pleasant as it could be, and sight sharper and much better than before.

These rules and advices help to all the people in the World, because same rules for wearing glasses apply everywhere so the informations and tips from the book are even more significant because of that.

OPTICS FAIRS IN PARIS AND MILAN

Every optician of different educational profile needs to be in a march of the world's events regarding the optics. One of the means is paying visits to most famous European and world optics fairs, such as Mido in Milan, which takes place each year in the month of May, and Silmo in Paris, which is held each year in October.

These fairs are significant above all because all new events in the field of optics can be found here, presentations of new world's manufacturing and fashion trends, as well as introducing with most popular world's manufacturers of both dioptré frames and sunglasses, instruments, small tools, contact lenses and maintaining cosmetics.

These two fairs belong to the most visited ones in the world and therefore a place where most popular world's manufacturers gather.

It is just another evidence of how respected and profitable optician profession is and thus present in all countries in the world.

In compliance with this fact, it should be emphasized that the huge importance of top-class experts influences such superb rating of all opticians in the world.
